

New Formatted Black Log -- Answer Key

Most of the new Formatted Black Log matches the original log book as described in *Spell to Write and Read*. However, some pages have added segments and others are completely new. This key will fill in the gaps on portions not yet addressed elsewhere.

Sample words are organized according to spelling sections in WISE Guide. This helps you, the teacher, better tailor the information to your students' learning level. For example, if you place students in Section P, you can start working with the concept of the chart using review level words taught before P. Then ask the student to collect additional examples of the same idea in the new spelling words. Space permitting, add these words to the chart. In this way, you teach an idea and then give them a chance to apply it.

B3: CK/ DGE. Select several review words to start then collect more samples through the year.

B33: GREEK & LATIN NUMBERS

Many English words are rooted in Greek and Latin word parts. If we know the meaning of the parts, we can more easily understand the meaning of new words. For example, “bi” means “two.” A “bi-plane” is a plane with two sets of wings. “Bimonthly” means every two years. “Bipartisan” means with support from two parties. If we know that “cycle” can mean “wheel” we recognize that a “bicycle” has two wheels, a “unicycle” has only one but a “tricycle” has three.

K-2	mono-	<i>monotone</i>
N-8	quart-	quart
O-3		quarter, quarterly
P-4	dec-	decimal
S-2	uni-	union
	cent-	century, centennial, centimeter
	bi-	bi-centennial
	tri- (Latin)	tri-centennial
S-3	milli	million, millionaire
T-1	uni-	universal
T-2	di-	division, dilemma
	semi-	<i>semi</i> -circle
V-3		<i>semi</i> -conscious
W-3	mono-	monotonous
	tri-	triangle
	bi-	bicycle
Y-2	mono-	<i>mono</i> -syllable
X-2	mille-	millennium
	semi-	<i>semi</i> -annual

For other examples not in WISE Guide, see SWR page 132 in addition to the list below:

Greek	hemi-	hem-i-sphere
	tri-	tri-ad
	tetra-	tet-ra-gon
	penta-	pen-ta-gon
	hexa-	hex-a-gon

	octa-	oc-ta-ge-na-ri-an
	novem-	no-ve-na, non-a-ge-na-ri-an

B34: LATIN ROOTS

This page defines Latin word parts that can be combined to build numerous words including nineteen found in WISE Guide. After dictating each spelling section below, illustrate a Start-Up word or two not in WISE Guide. For example, after M2, have students sound out and write “emit” on the line with “e-” (out), under “mit” (send). In the same way add: “re-” (back) + “mit.” Together search M2 for a related word to add (omit). Discuss and select possible derivatives (omitted, omission) for the unused blank line under “omit.”

Those starting higher than M2, should include all the Start Up and WISE Words taught prior to the section they are studying. Continue to build this chart a little at a time as you progress through WISE Guide.
